PROJECT TITLE: KEYWORD RESEARCH USING GOOGLE KEYWORD PLANNER

INTRODUCTION:

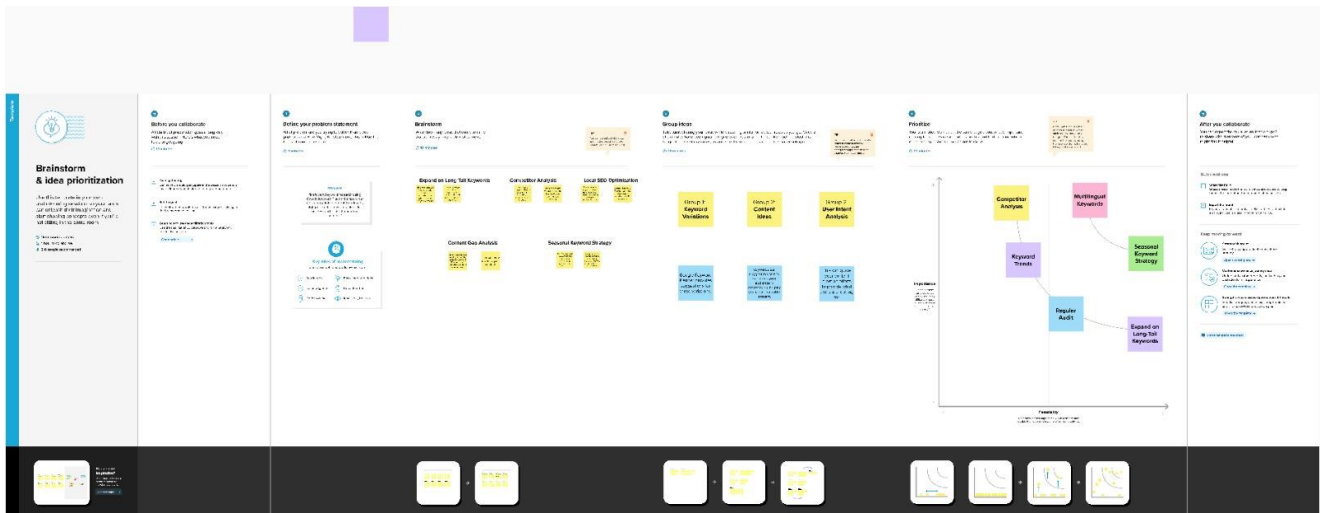

Google Keyword Planner is a powerful tool offered by Google Ads (formerly known as Google AdWords). It's designed to help advertisers and website owners find relevant keywords for their online marketing campaigns. The tool provides valuable insights into search volume, competition, and cost-per-click data for specific keywords, making it an essential resource for optimizing ad campaigns and SEO strategies. It enables users to discover new keywords, plan advertising budgets, and estimate the potential success of their online marketing efforts

STEP 5: ANSWER THE PUBLIC

Answer The Public is a free social listening tool to see what keywords and phrases people use on search engines like Google and Bing. It uses autosuggest to uncover this related information, providing additional data, including search popularity, search volume, and predicted cost-per-click.

CONCLUSION:

You can use it to discover new keywords, see their estimated search volumes, and learn how much it costs to target them. While Google Keyword Planner is technically a PPC (pay-per-click) advertising tool, you can also use it to find keywords for your SEO (search engine optimization) strategy.
